Explosion-Proof Camera System

Videolarm, the industry leaders of innovative surveillance camera housings and accessories, are proud to announce its new “**Explosion-Proof**” PurgeDome camera system.

UL Class 1 – Division 2 Certified, Videolarm’s PurgeDome system provides a highly effective solution for monitoring in hazardous environments. The new system operates on a supply of compressed air or inert gas which regulates the pressure within the sealed camera enclosure. This constant regulation process ensures that the internal monitoring camera and equipment are protected from extremely hazardous fumes or gasses, which, when combined, could ignite in a violent reaction / explosion. If and when a change in pressure in the surrounding monitoring area occurs, the PurgeDome system will automatically send an alarm to the operator notifying the dangers to help prevent or spread an explosion.

With a UL certification, Videolarm’s PurgeDome is an ideal candidate for monitoring chemical facilities, oil refineries and off-shore oil rigs. The explosion-proof camera system is available in two distinct models: IP Ready Digital PTZ Camera or Analog PTZ Camera (23x Optical / 10x Digital Zoom with high-res auto focus integrated day/night IR). As an added feature, both systems include a heater / blower.

About Videolarm, Inc.

Surveillance camera and accessory manufacturer, Videolarm, www.videolarm.com, developed the first outdoor dome enclosure in 1976. For the past 30+ years, they have been providing innovative surveillance solutions to Schools and Universities, Parking and Correctional facilities, Hospitals, Retail centers, Nuclear and Water Management plants through its international network of distributors, integrators, installers, and OEMs. The privately owned manufacturer is located in Decatur, GA, just east of Atlanta. Pricing and information are available online at www.videolarm.com or directly through Videolarm’s sales department at (800)554-1124, from 8:00am to 5pm Eastern Time.
